

## **EuroGeoSurveys 50<sup>th</sup> Anniversary – Young Geoscientist Competition**

Brussels, 4 July 2022

### **EuroGeoSurveys 50<sup>th</sup> Anniversary Event**

EuroGeoSurveys (EGS) will be holding its 50<sup>th</sup> anniversary event in October 2022. The event celebrates the long collaboration between 37 European geological surveys with an overall workforce of several thousand experts, which make up the membership of EGS. During this time, the Geological Surveys of Europe have been working together to deliver geoscientific knowledge and data to the EU institutions to support policy making for the benefit of society.

The collaboration between Geological Surveys has been providing pan-European development of harmonised data on topics such as subsurface resources, sustainable urban development, environmental and waste management and natural geohazards since 1971. During the anniversary celebration events, EuroGeoSurveys will honour their past work and look to the future as they continue to collaborate in developing a path towards a Geological Service for Europe.

### **A Call to Young Geoscientists – What is the Future of Collaborative Geoscience in Europe?**

On the theme of collaboration for the anniversary celebrations, EGS is inviting young geoscientists based in Europe to share their opinions on how they see collaboration in European geoscience in the future. These ideas should be shared in a one-minute video abstract. The winning entry will receive funding to attend the 50<sup>th</sup> anniversary event on the 27<sup>th</sup> of October and the opportunity to deliver a ten-minute presentation to industry, political and geoscientific leaders from Europe and beyond. Please see the video below to find out more.
